1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

Claim 14:

Line 5, "second" has been changed to --first--.

The changes have been made to in order to comply with the 35USC 112, second paragraph and to place the application in a condition for allowance.

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest selecting a tap-point in the first resistor circuit in response to a selection signal and adjusting the trip point level associated with trip point detection signal in response to the selected tap point in the first resistor circuit as called for in claim 1, coupling a first amplifier to the output node through a second resistor circuit, coupling a second current source to the output node through the second resistor circuit adjusting at least one of a current level associated with the second current source and a resistance level that is associated with the second resistor circuit in response the sensed output voltage as called for in claim 3, a first current source that is arranged to provide a first current, wherein the first current has a first level that is approximately constant, a first resistor circuit that is coupled between a common node and the first current source wherein the first resistor circuit has an associated tap-point, wherein the first resistor circuit comprises at least a first resistor and a second resistor that are coupled together at the tap point as called for in claim 6, resistor means that comprises at least a first resistance

means and a second resistance means that are coupled together at the tap point and a current source means that is arranged to couple a sense current to the resistor means such that the trip point level is provided at the tap point in response to the sense current as called for in claim 15, first current source, third resistor circuit, a second current source an amplifier circuit as called for in claim 21. Therefore, claims 1-3 and 5-22 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
